

Hamming distance separated by family size

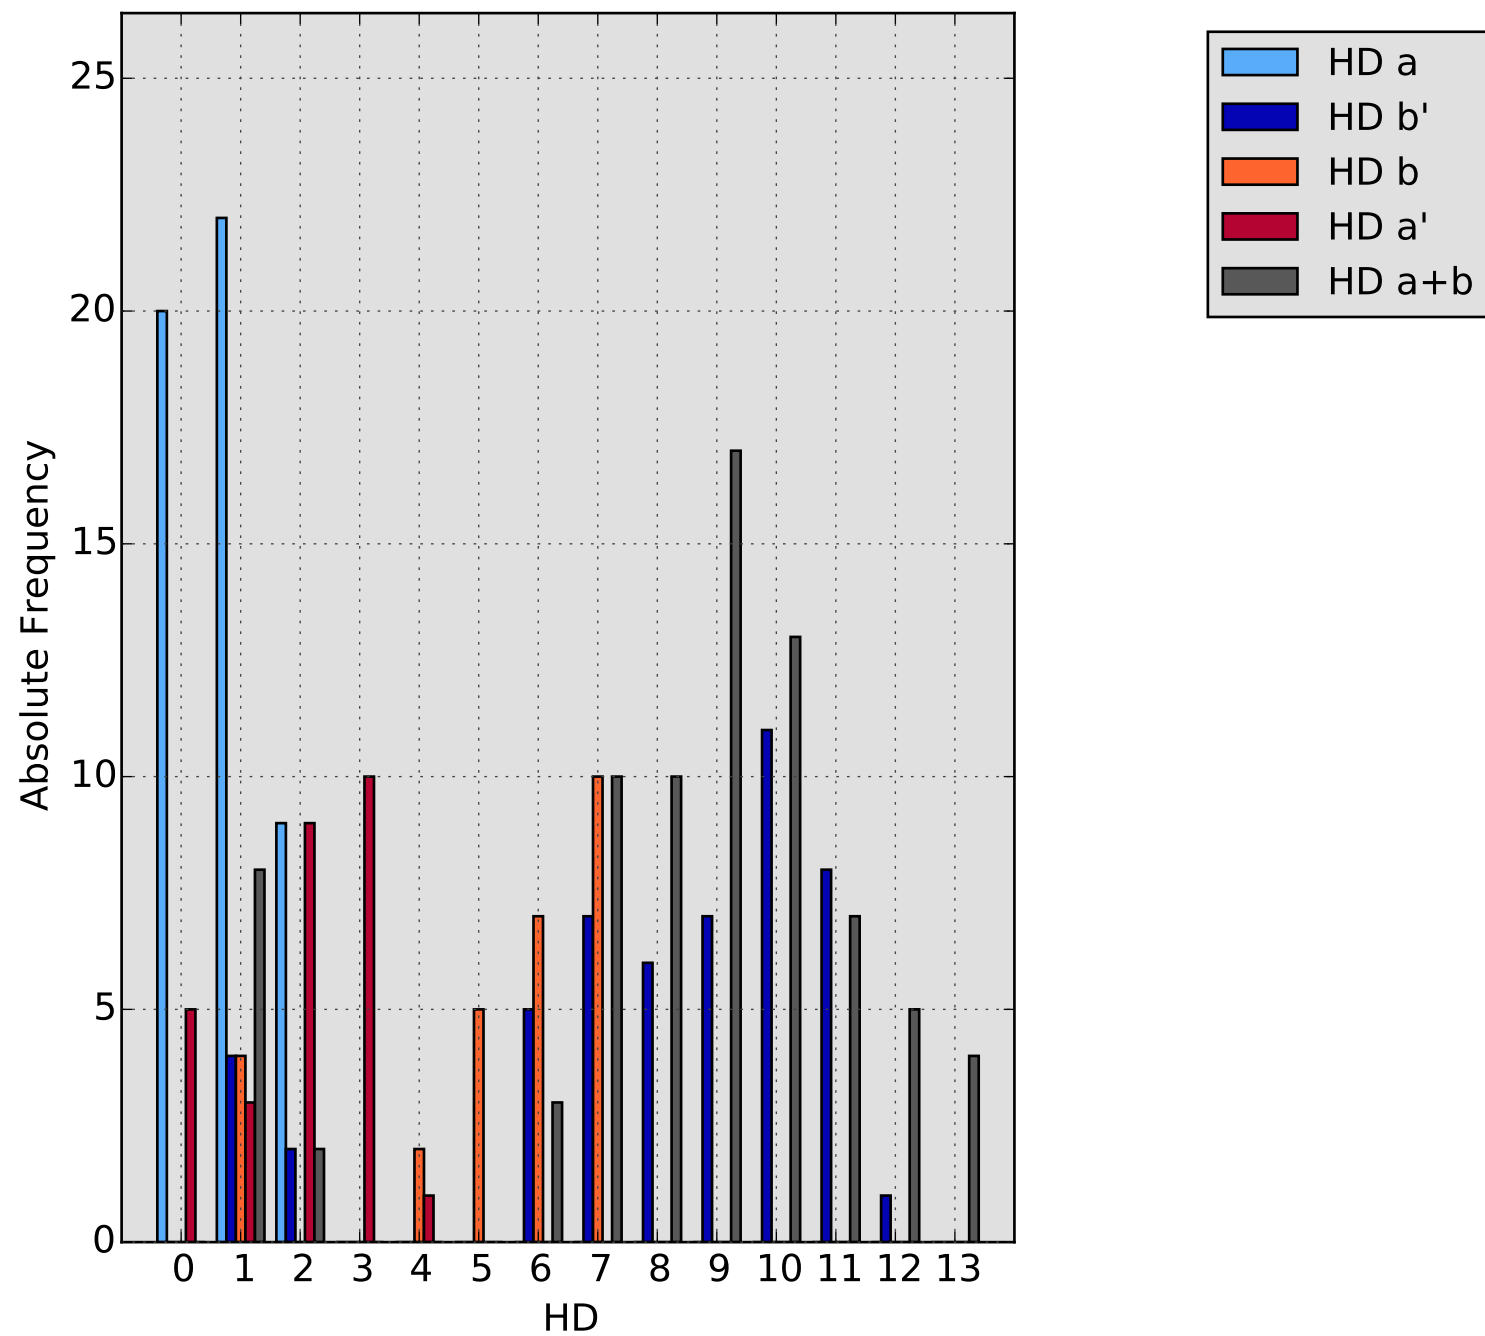

sample size= 20 against 20

Family size distribution separated by Hamming distance

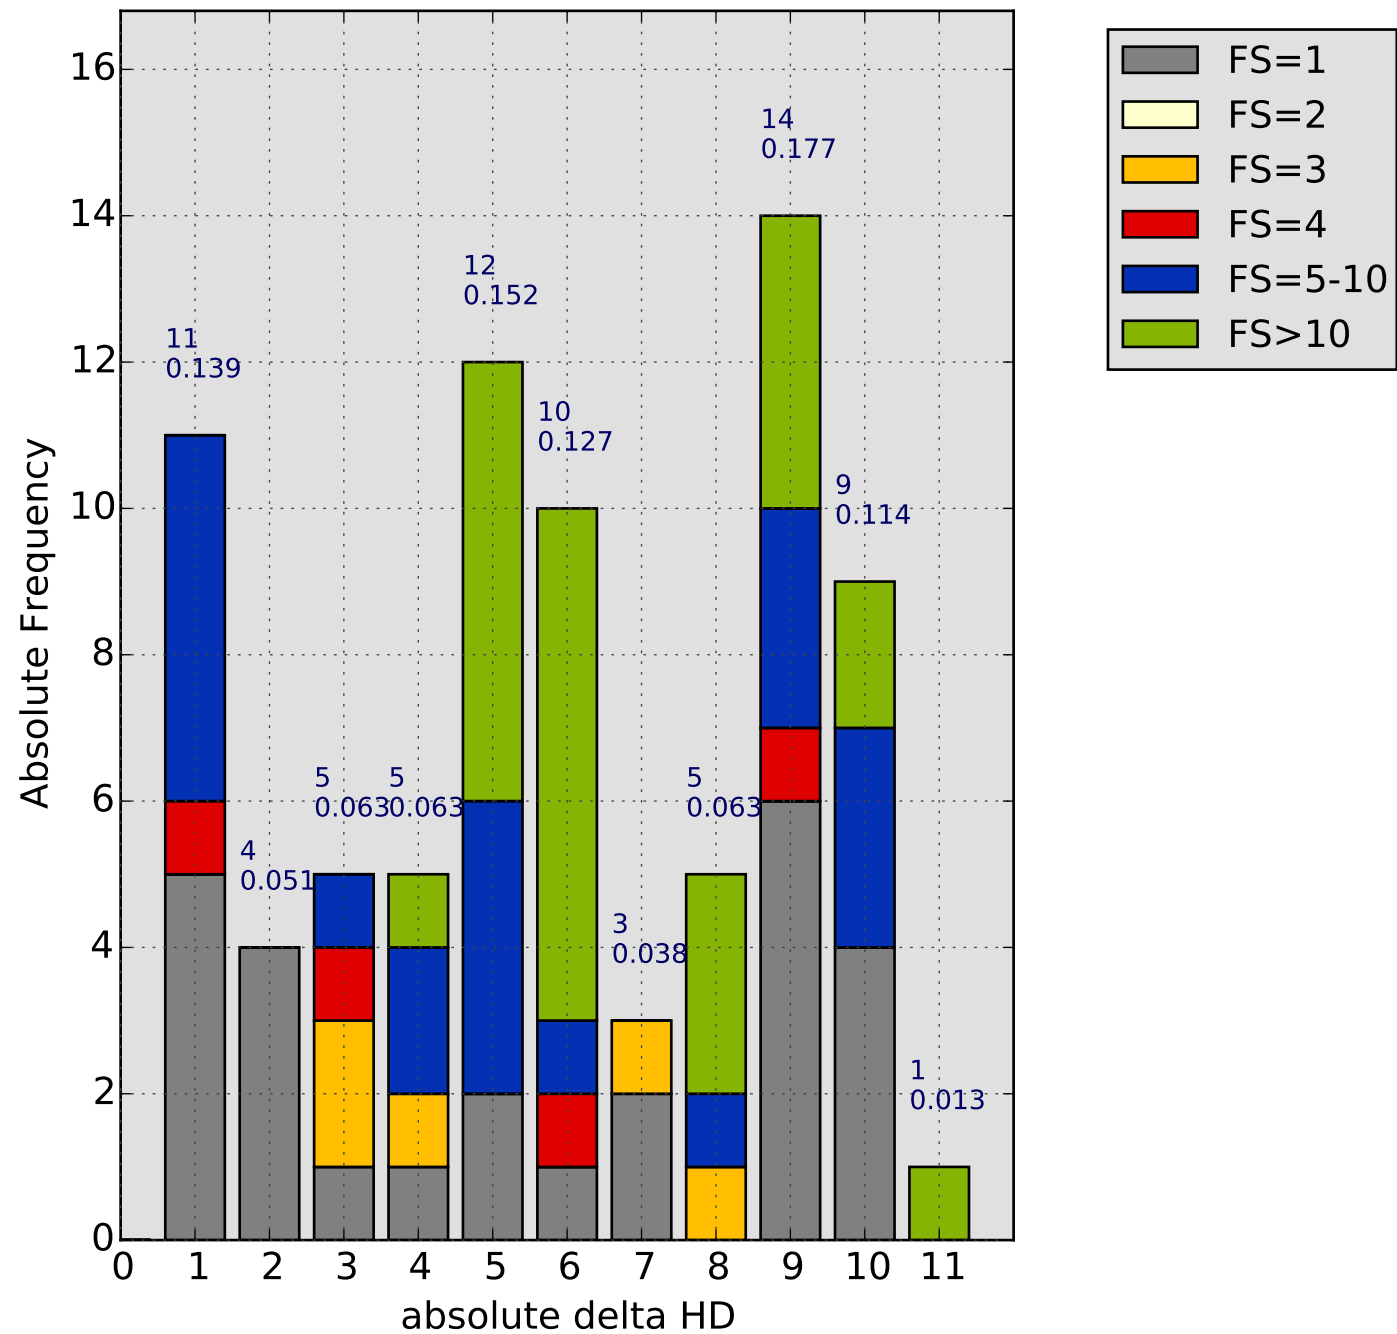

max. family size:	13	singletons
absolute frequency:	2	7
relative frequency:	0.10000	0.35000

Hamming distances within tags

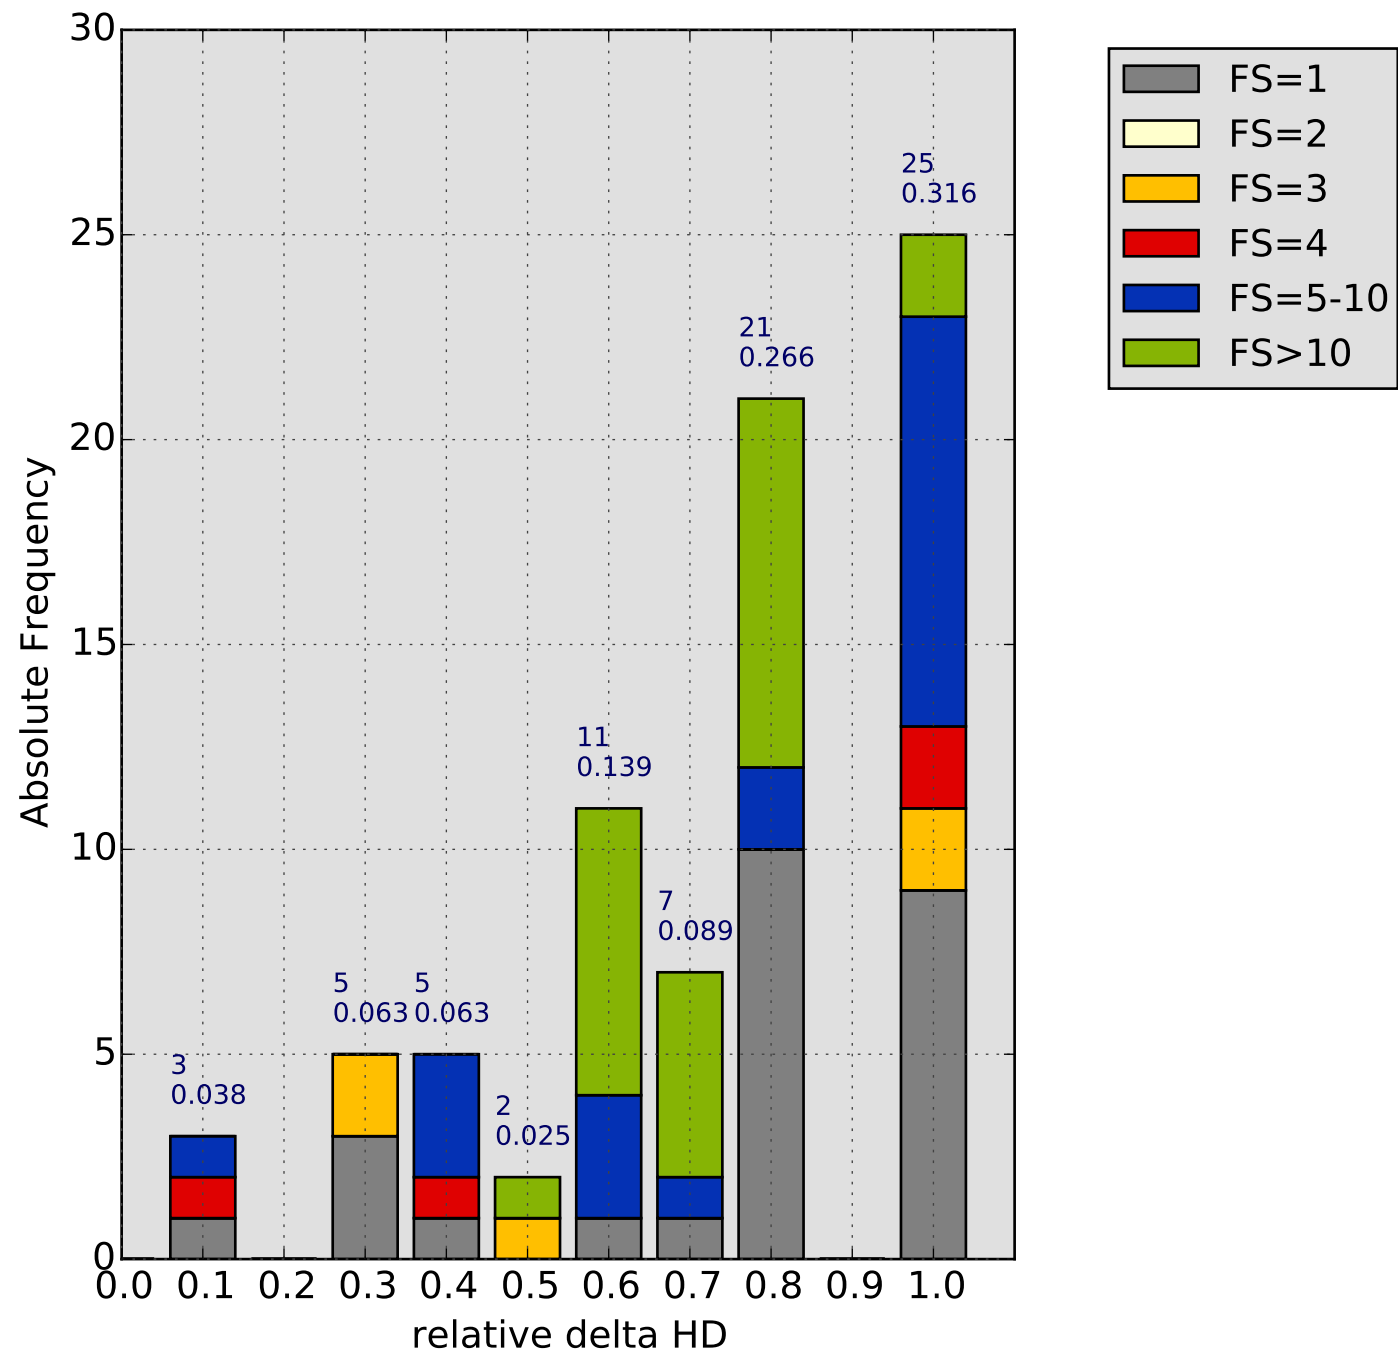

sample size= 652 against 20

Delta Hamming distance within tags

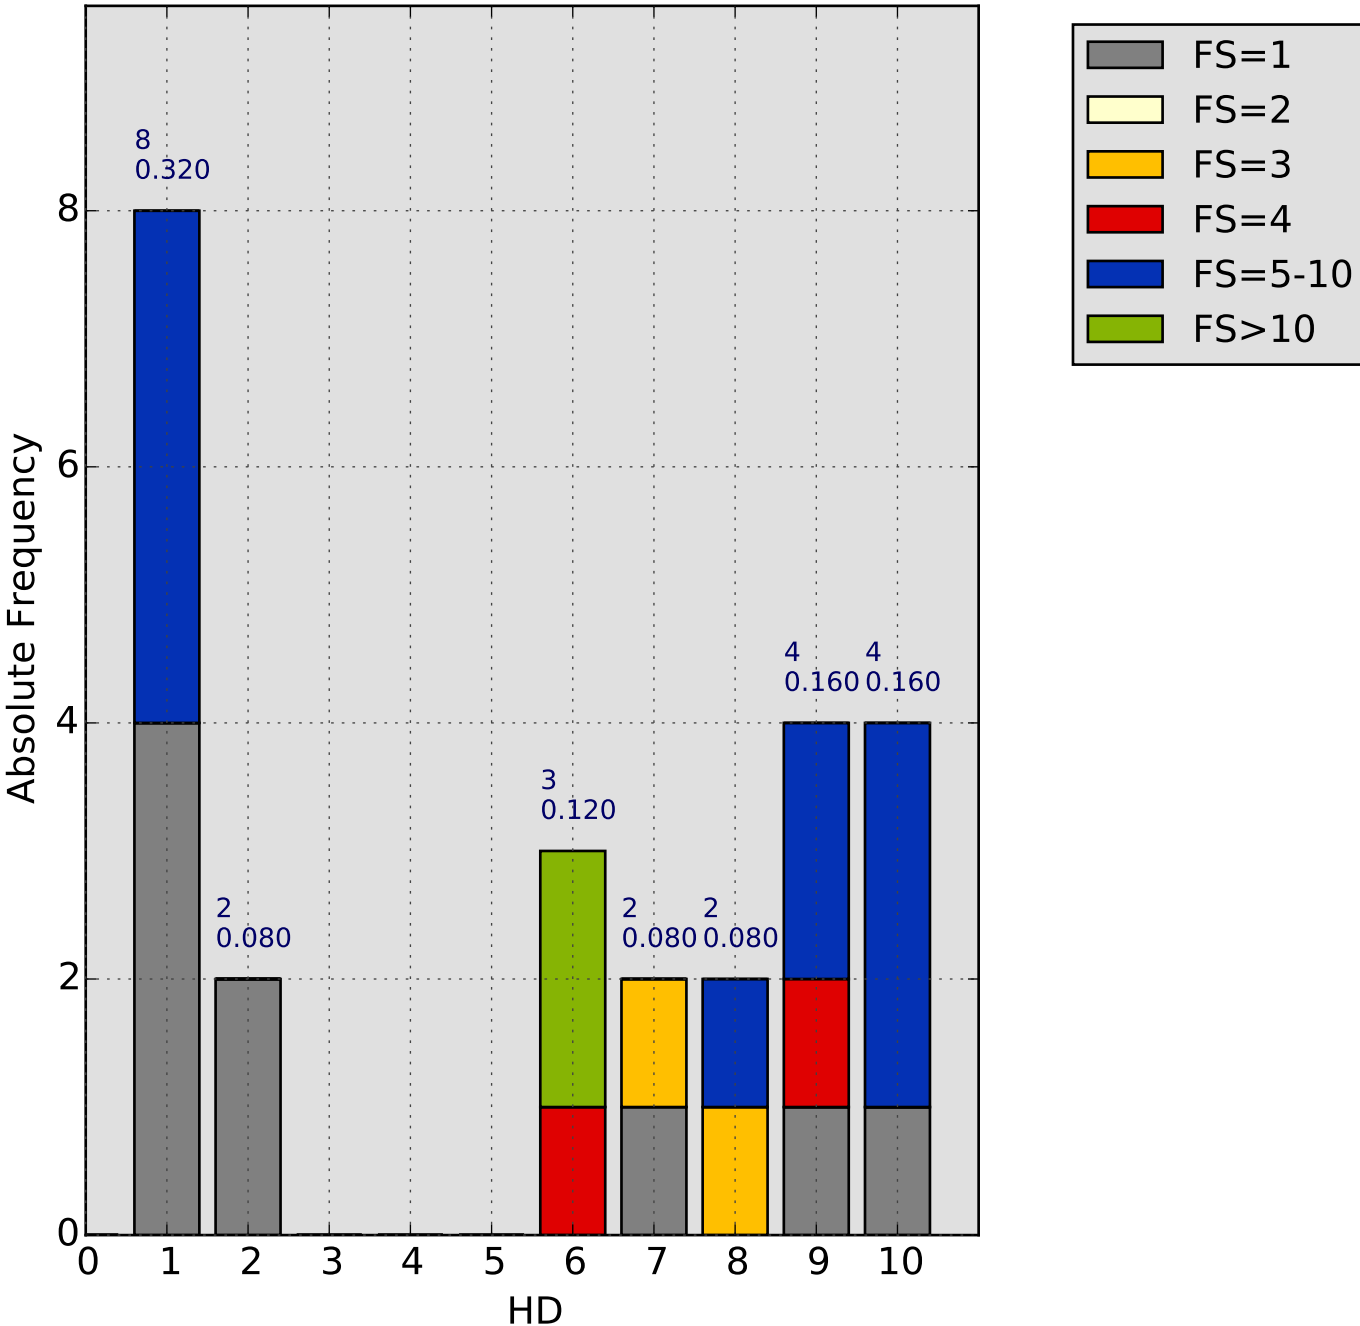

sample size= 79 against 20

Chimera Analysis: relative delta Hamming distances

Hamming distance of the non-identical half of chimeras

sample size= 25 against 20
