Hamming distance separated by family size
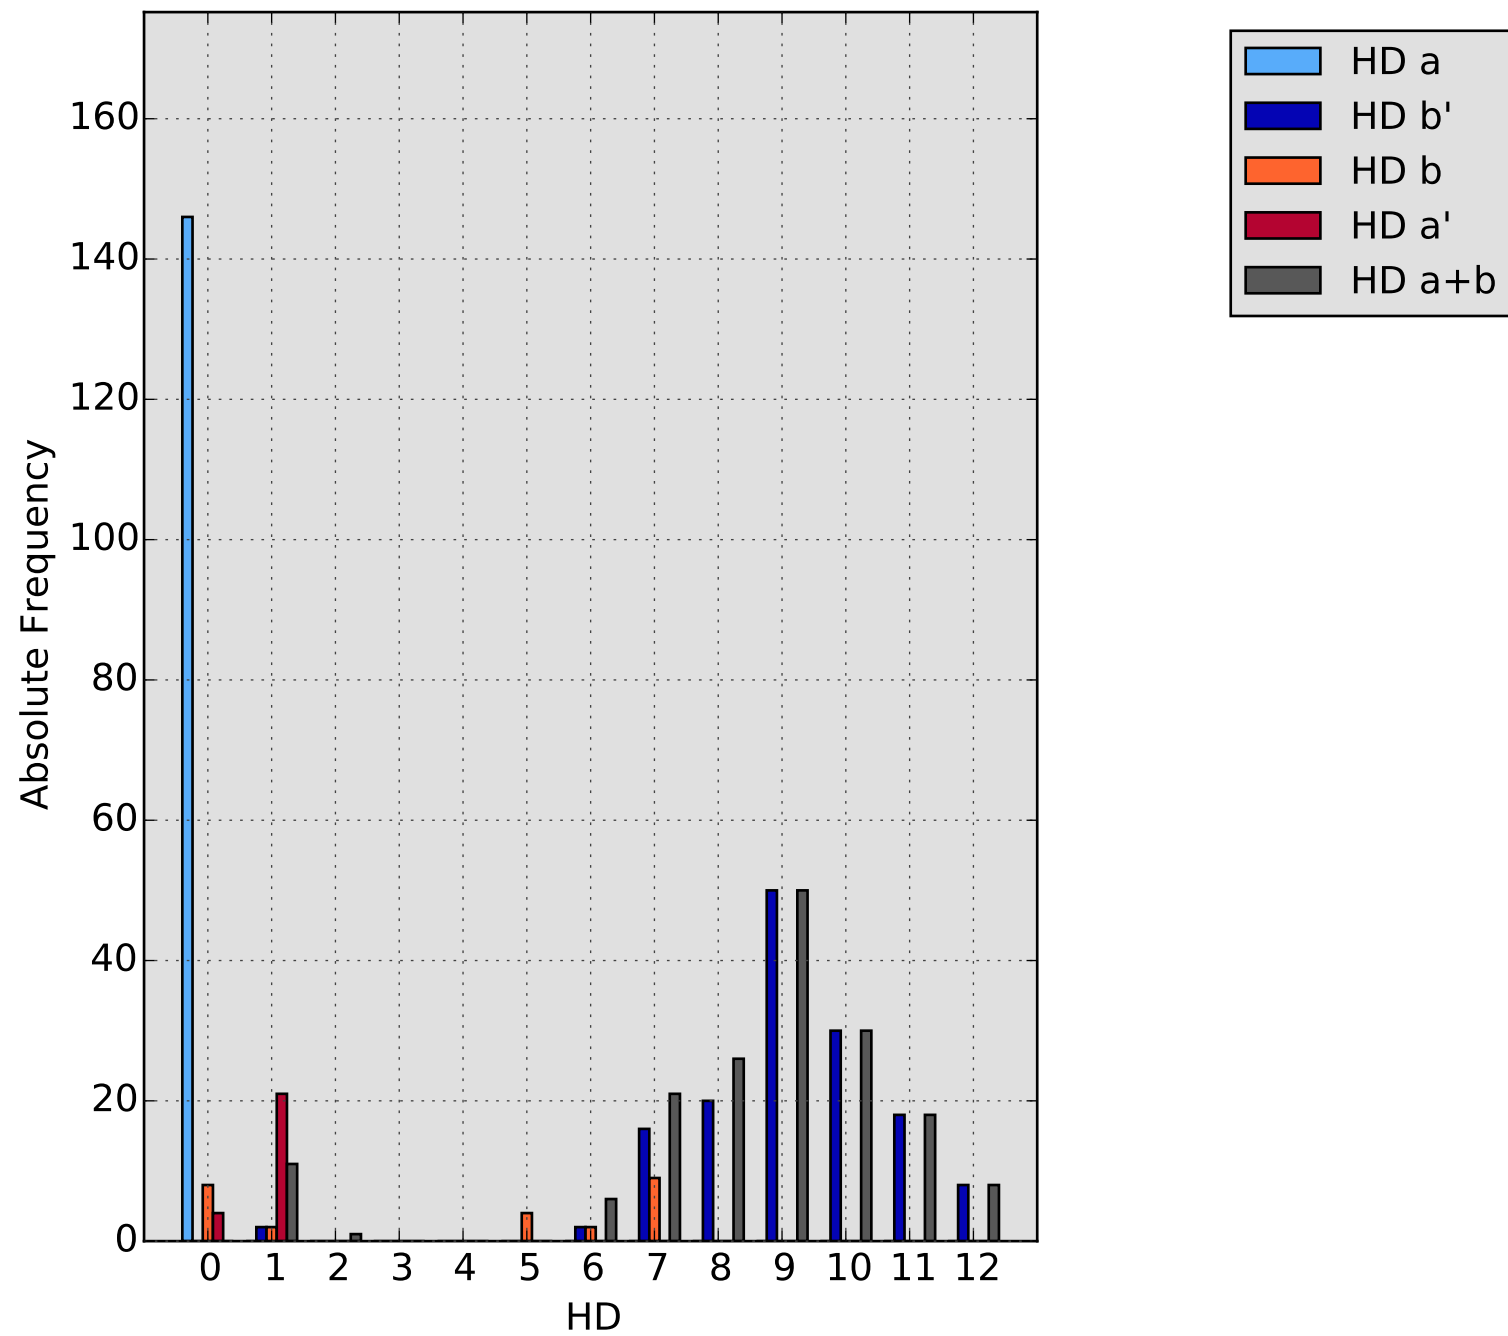

sample size= 20 against 20

Family size distribution separated by Hamming distance

|	
max. family size:	7		singletons
absolute frequency:	1		14
relative frequency:	0.05000		0.70000

Hamming distances within tags

sample size= 1,448 against 20

Delta Hamming distance within tags

sample size= 171 against 20

Chimera Analysis: relative delta Hamming distances

sample size= 171 against 20

Hamming distance of the non-identical half of chimeras

sample size= 158 against 20
